Company Profile

DMS Global Supply · BUILT TO SUPPLY

DMS Global Supply is a Conakry-based procurement, sourcing and supply company serving construction, industry, infrastructure, mining-related operations, transport, fleet maintenance and commercial projects.

DMS is a company in transformation, built on real commercial experience and being structured for the next stage of growth.

Our story

DMS traces its roots to 1999, when the business began as a local hardware store in Conakry, Guinea. Since then the path has been one of progressive steps. Each is labelled with where it stands today.

1999 · Local hardware roots — The business begins as a hardware store in Conakry.

Then · Market experience — Daily trade with artisans, contractors and private builders builds practical knowledge of what sites need and where supply breaks down.

Then · Business development — The customer base widens from retail buyers toward construction companies and industrial users.

Now · Professional procurement and sourcing structure — A documented process: written RFQ, quotation, approval, delivery documentation and follow-up.

Next · Digital supply platform — This website and its online RFQ are the first components. Commercial management tools, a client portal and a supplier portal are being developed.

Later · West African expansion — A regional ambition. DMS operates from Conakry today.

Mission

To make sourcing and procurement simpler, more reliable and more accessible for businesses operating in Guinea and, progressively, across West Africa.

Vision

To build a trusted African supply platform connecting business requirements with reliable sourcing, procurement and delivery.

How DMS positions itself

Guinea-based. Operating from Conakry, with knowledge of the local market.

African-focused. Built around the needs of African construction, industry and infrastructure.

Internationally sourced. International sourcing is handled case by case, according to the product and the supply channels available.

Where DMS stands today
